- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

### Languages

- English (Fluent)
- Chinese (Fluent)
- Malay (Intermediate)
- Cantonese (Fluent)

### Profile

I am an enthusiastic and detail-oriented IT student with a strong interest in Cybersecurity and secure software development. Skilled in C++, PHP, JavaScript, HTML, CSS, Python, Java, Oracle SQL, and beginner-level ASP.NET MVC. Passionate about protecting digital systems, identifying vulnerabilities, and applying security best practices. Eager to grow in the cybersecurity field by contributing technical and analytical skills to build safer digital environments.

### Work Experience

- C++ Programming 2024  
Food and Beverage System
  - Developed a C++ console-based food & beverage ordering system with menu browsing, order placement, and receipt generation.
  - Completed as a course project, fully tested with sample data, and met all requirements. Demonstrated hands-on C++ skills in solving real-world ordering tasks.
- Java Programming 2025  
Library Management System
  - Developed a Java-based Library Management System with features like book inventory, user registration, and borrow or return operations. Applied OOP principles including encapsulation, inheritance, and polymorphism.
  - Completed as a course project with a clean class structure and functional simulation.
- PHP Web Development 2025  
Online Shopping Web System
  - Developed a full-stack PHP-based online shopping system with user registration, product browsing, cart, checkout, and admin inventory management.
  - Used PHP, HTML, CSS, JS, and MySQL. Successfully tested in a simulated environment, demonstrating strong understanding of real-world e-commerce and full-stack development.
